Introducing Apple Tap 2 Pay (AT2P) for iPhone

Sent: November 14, 2024

Dear Valued Fiserv Partner,

We are excited to announce the launch of **Apple Tap 2 Pay (AT2P) for iPhone** with the **Clover Go** app, *a revolutionary way to accept contactless payments with ease and security*! With this new feature, merchants can accept **contactless payments** right on their iPhone—no additional hardware required! This feature is available to all the merchants across all Clover SaaS plans. This will be launched starting today in a phased approach.

Key Features

- **No Additional Hardware Needed**: Simply download the **Clover Go app** on iPhone, and merchant is ready to accept contactless payments.
- **Easy Setup**: Merchant associates their **Apple ID** with **Clover merchant ID (MID)** within the app, and they are good to go. It's that simple!
- **Versatile Use:** Perfect for quick-service restaurants, delivery services, and any business on the go.
- **Security and Privacy**: Apple's technology uses the built-in features of iPhone to keep both the business and customer data private and secure. Card numbers are not stored on the device or Apple servers after processing.

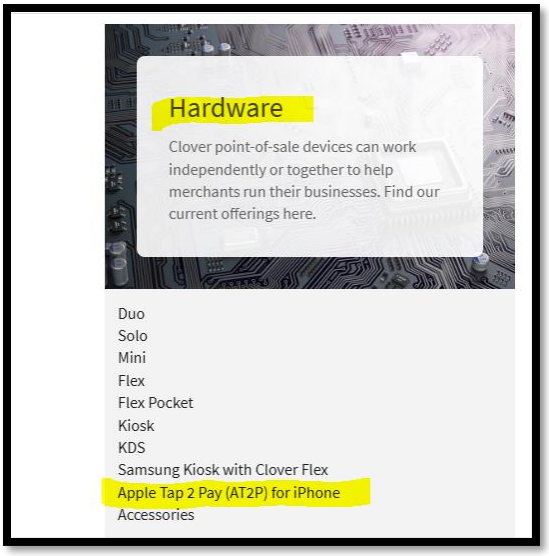

Important Notes:

- iPhone XS and above models are supported for Tap to Pay on iPhone
- IOS 16 and above is required
- Apple iPads are unsupported
- Unavailable to merchants using Surcharge
- Offline payments/limited mode is not supported
- iPhone unlock by passcode or Face ID required.

Merchant will be communicated about this new feature in phases:

Email 1 to existing merchants > Tap to Pay on iPhone is Now Available with Clover!	11-13-2024
Email 2 to existing merchants > Tap to Pay on iPhone — Expand where you do business.	11-26-2024
Social Post 1 >Cobranded, Instagram and Facebook	11-13-2024
Blog 1 > Tap to pay on iPhone now available with the Clover Go app	11-13-2024

For more information, please visit the dedicated "Apple Tap 2 Pay" section in "Hardware" on the "Home Page". Within that folder you will find:
