

Clover Kiosk: Serve up customer satisfaction

In quick service restaurants, efficiency is a key ingredient. Clover Kiosk, complete with a payment terminal and built-in printer, speeds up the ordering process while giving your customers complete control over their meal, enhancing their experience and boosting profitability.

Increased order sizes

Kiosks give customers more freedom and flexibility to browse and customize, leading to 10-30% higher order values[1] with the help of suggested items and add-ons.

Streamlined operations

By letting customers place their own orders, wait times are lowered and front-of-house tasks become automated, saving money on labour costs.

Integrated workflow

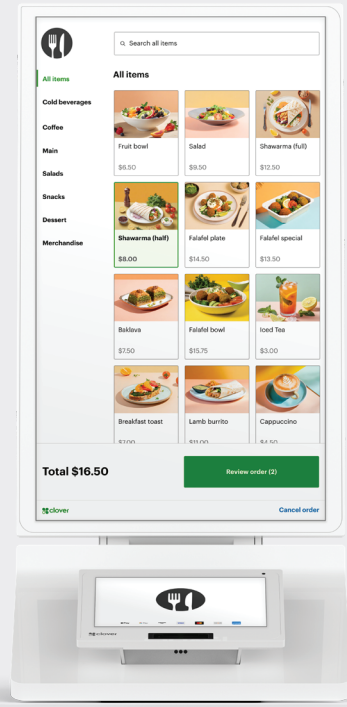

Menus are automatically imported and synced across all devices. Easily add pick-up and dine-in orders, all while ensuring accuracy and reducing food wastage.

Improved customer experience

Convenience, control and customization make for a happier customer. With Clover Kiosk, they browse menus at their own pace, customize food exactly how they want and order without having to wait in line.

The Clover Kiosk advantage

Hardware	Two-screen large enterprise kiosk (24”), w/8” payment display
Software	Clover Kiosk App
Payment Terminal	Integrated 8" payment display
Payment Options	Contactless, Chip, and Magstripe
Installation Required	No
Mounting	Wall, Countertop and Floor stand (Wheelchair accessible)
Receipt Printer	Built-in

The hardware – ready without installation

- A commercial grade 24” touch screen and 8" payment terminal, perfect for branding
- User-friendly, intuitive interface with anti-fingerprint and anti-glare coating
- Adjustable floor stand for wheelchair accessibility
- Uses standard 3-1/8" thermal receipt paper

The software – automatically downloaded

- Connects to and pulls your menu directly from your Clover POS system – keeping your items and pricing in sync
- Orders show on your Kitchen Display System or print to your kitchen printer just as if they were placed at your counter
- Easily turn categories, menu items and modifiers on and off
- Add your own promotions, specials and more to a content loop that runs when the kiosk is inactive
