Moneris

# Two styles. One powerful solution. Moneris Go Terminal.

Accept payments anywhere with the Moneris Go Terminal in Ivory and Onyx—fast, flexible and secure payment solutions that Canadian businesses trust.

Onyx

Ivory

## Built for today's businesses. Ready for tomorrow's commerce.

### Built for business growth

Designed to support businesses of all sizes—from independent retailers to multi-location operations.

### Reliable performance

Proven hardware and software built to handle high transaction volumes and diverse environments.

### Effortless onboarding and intuitive use

Minimal setup right out of the box with cloud-enabled device management and a large display for a smoother, more user-friendly experience.

### All-day power and portability

Stay connected and powered all day with long-lasting battery life and a device that connects via wireless or mobile data.

### Unified integration

Seamlessly connects with Moneris Go API and ecosystem.

### Flexible packaging

Choose from device-only, charging base or functional base options.

Moneris

# Why choose Moneris?

- **Security-first approach**
  All terminals meet the latest PCI standards and are future-ready.
- **Real-time insights**
  Access transaction data and business analytics to make informed decisions.
- **24/7 live bilingual support**
  Dedicated assistance when you need it, in English and French.
- **Canadian expertise**
  Proudly serving businesses across Canada with local support and innovation.

## Give your customers options

Offer your customers the ability to pay with their card of choice, with support for all major payment types and so much more.

### Dynamic currency conversion

Let your customers make contact and contactless payments in over 110 different currencies.

### Installments enabled by Visa®

Allow your customers to pay in more manageable installments.

### Moneris gift cards

Be there for your customer's big moments with gift cards customized for your business.

## Integrate your way

Choose the integration that's right for you with direct, app-to-app or cloud integrations available, giving you the ability to unlock even more value.

### Tokenization

Securely store card data for recurring payments.

### Store and forward

Process payments even if your internet connection is interrupted.
